### **Key Projects**

- **Hugsi.io (Husqvarna Group)**

By applying computer vision and deep learning techniques on satellite images, HUGSI measures and analyses urban green space in select cities across the globe. In Hugsi I worked as a lead developer managing frontend with ReactJs(Gatsby) and backend with

Lambda functions.

- **TCSP**

TCSP is a product of Husqvarna group and it is used to auto detect relevant auto mowers based on criterias like its grass field, size of the area and so many. Worked as a frontend developer with ReactJS Technology

- **Didge.IO**

Didgo.IO is a task management tool mainly created for the hotel industry. Tech stack of this project are ReactJS(NextJS) and NodeJS(NestJS) Frameworks. I managed this project as a Tech Lead.

- **Frementa**

Frementa is a real estate portal used for buying, selling or renting properties. Tech stack of this project are ReactJS(NextJS) and NodeJS(NestJS) Frameworks with microservices in backend and GraphQL APIS. I managed this project as a Tech Lead.

- **Newstream**

Newstream is a product for News channels where journalists/publishers can connect virtually with reporters all over the world and buy news digitally. In the Newstream project worked as a full stack developer. Technologies I used were ReactJS(NextJS) and NodeJS(NestJS) Framework with GraphQL API and POSTGRESQL Database.

- **Breathonix**

Breathonix is about delivering results far faster than a blood draw, breath testing could streamline medical diagnostics by providing a non-invasive way to collect critical health data. In Breathonix, Used nodeJS and ReactJS techstack.

- **Dearcow**

Dearcow was built for a dairy farm to deliver milk products freshly on time daily. In Dearcow, Customers can set their daily criteria or monthly plan and timing for delivery of milk etc. Used Angular 8 as frontend and NodeJS (Express.js) as backend.
